

Ordering/Measuring Instructions

(Excluding Windshield Shades)

An AIRXCEL Brand

Note: Final product Tolerance for shade width is +/- .25" per shade

1. **Customer Information**

Complete the customer information section.

2. **Night Shade Material**

Enter your night material choice.

3. **Product**

Select MCD American **Duo**® Day/Night or **Solo**® (Day or Night) shade.

4. **Operating Mode**

Select Manual, Remote Electric, or Combo (remote electric night shade and manual day shade).

5. **Valances**

Select YES if you have a valance across the top of your window.
Select YES if you have valance side legs that wrap around the front.

6. **Window Location**

Identify where each shade will be installed; e.g., dining, kitchen, driver etc.

7. **Width**

Measure the INSIDE width of the valance as close to the top as possible.
Deduct a minimum of **.5"** total to provide clearance space for installation.
(For a shade that is NOT mounted in a valance, provide the exact width of shade assembly you desire.)

8. **Drop Length**

Measure from the INSIDE top of the valance, or mounting position, to the bottom of the window frame.

9. **Upper Set Limit**

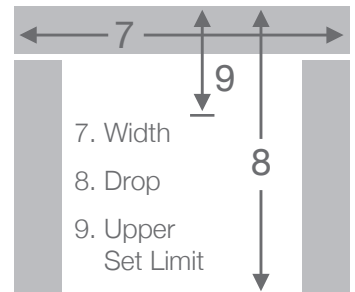

Measure from the INSIDE top of the valance, or mounting position, to the **upper point**, where you want the bottom of the shade to stop when it is raised. This upper set limit will be pre-set.

Minimum for a Duo Shade is 5" and a Solo Shade is 3.5"

10. **Price**

Use the **PRICE GUIDE** to determine the shade pricing.

(Note that Remote Electric Shades require one motor for **EACH** shade roller and either a 2 or 15-channel remote controller. See price guide for additional charges.)

Note:

- You will need at least 2 inches of space for the shade to roll freely inside a valance.
- **All MCD shades are custom-made and are non-returnable.**
