

Ordering/Measuring Instructions

(Excluding Windshield Shades)

Note: Final product Tolerance for shade width is +/- .25" per shade

1. Customer Information

Complete the customer information section.

2. Night Shade material

Enter your night material choice.

3. Product

Select MCD American **Duo** Day/Night or **Solo** (Day or Night) shade.

4. Operating Mode

Select Manual, Remote Electric, or Combo (remote electric night shade and manual day shade).

5. Valances

Select YES if you have a valance across the top of your window.
Select YES if you have valance side legs that wrap around the front.

6. Window Location

Identify where each shade will be installed.

7. Width

Measure the INSIDE width of the valance as close to the top as possible.
Deduct a minimum of **.5"** to provide clearance space for installation.
(For a shade that is NOT mounted in a valance, provide the exact width of shade assembly you desire.)

8. Upper Set Limit

Measure from the INSIDE top of the valance, or mounting position, to the **upper point**, where you want the bottom of the shade to stop when it is raised. This upper set limit will be pre-set.

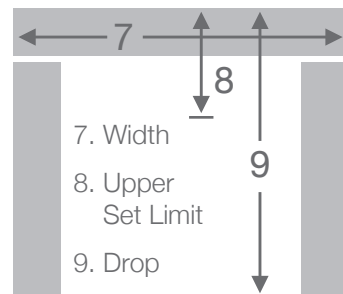

Minimum for a Duo Shade is 5" and a Solo Shade is 3.5"

9. Drop Length

Measure from the INSIDE top of the valance, or mounting position, to the bottom of the window frame.

10. Price

Use the **PRICE GUIDE** to determine the shade pricing.
(Note that Remote Electric Shades require one motor for **EACH** shade roller and either a 2 or 14-channel remote controller. See price guide for additional charges.)

Note:

- You will need at least 2 inches of space for the shade to roll freely inside a valance.
- All MCD shades are custom-made and are non-returnable.**
